DETAILED ACTION

Page 2

Specification

1. Applicant is reminded of the proper language and format for an abstract of the

disclosure.

The abstract should be in narrative form and generally limited to a single

paragraph on a separate sheet within the range of 50 to 150 words. It is important that

the abstract not exceed 150 words in length since the space provided for the abstract

on the computer tape used by the printer is limited. The form and legal phraseology

often used in patent claims, such as "means" and "said," should be avoided. The

abstract should describe the disclosure sufficiently to assist readers in deciding whether

there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information

given in the title. It should avoid using phrases which can be implied, such as, "The

disclosure concerns," "The disclosure defined by this invention," "The disclosure

describes," etc.

Claim Rejections - 35 USC § 112

The specification shall conclude with one or more claims particularly pointing out and distinctly

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

the remaining to a decrease, or are execute being about a consistency

claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/790,807 Page 3

Art Unit: 3761

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear to the examiner what is meant by the term "jump-type". The specification does not define the term. Clarification is requested.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claim 1, as best understood by the examiner, is rejected under 35 U.S.C. 102(b) as being anticipated by Quadrini USPN 5112326. Quadrini discloses a disposable article with a fleece sticker 31 disposed on the front, and a rear piece having adjusting buckle belts 28, 30 attached at both lateral edges and capable of being fastend to the fleece sticker 31. The adjusting buckle belt are made up of a plurality of fastening facets 28, 30, 52 *Figure 7) and soft facets, which divide the fastening facets. The fasteners are capable of joining the fleece sticker portion 31 and to be adjustable for the best fit (col. 1, line 60 through col. 2, line 29).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Warnken USPN 3653381, Krushel USPN 4773906, and Cooper 5087253 are cited to show adjustable diapers with plural fasteners.
